REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the prior art of record does not disclose or suggest a selective hydrogenation process in which an alkyne in a liquid absorbent is contacted with a gas stream comprising hydrogen and greater than 2000 ppm carbon monoxide. The Johnson reference discloses the hydrogenation of an alkyne in a liquid absorbent but does not disclose the presence of carbon monoxide in the hydrogen gas stream. While other references disclose the presence of carbon monoxide during hydrogenation, none disclose the claimed amounts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
